## About REDDYco

REDDYco offer products and services that enable their customers to deliver sustainable profits through people. They achieve this through a 360 degree view of the company through Assessments, Guidance, Implementation and Solutions.

REDDYco specialises in assessments and has the ability to carry out assessments in a number of areas including; supply chains, finance, government, fashion, NHS and others within both the private and public sectors.

Their premier, Responsible Trade Worldwide (RTW) assessment was developed in line with existing labour standards, and social sustainability factors which echo their founders core belief, that people overwhelming represent an organisations' greatest asset whether they be sewing garments in a Bangladeshi factory, or climbing the corporate ladder in the City, they should be treated equally – at REDDYco, they ensure just that.

Their focus is on the 4 areas to assess; survey, generate benchmarks and create the insight required to help organisations to improve through their people.
