Looking at the macro affects on the market with case studies from Georgia and Azerbaijan, Paul will also discuss areas in which he expects to see changes and why.

### Speaker Bio

#### **Paul Randall, Director of Business Development, Creditinfo International**

Mathematician by education, risk manager by experience. With over 26 years experience in credit risk management, Paul Randall has been working with Creditinfo since April 2007.

Following graduation he worked with 2 retailers on the financial services side JD Williams, M&S Financial Services, then moved to the Co-operative Bank. During the period of his employment Co-operative Bank was an innovative provider of banking services and the risk management environment to support it. It was one of the first organistaions to deliver a enterprise wide customer risk

assessment supporting all decision processes.

He then moved to the consultancy side, the head of scoring and consultancy in Scorex in UK for 7 years then member of the Experian-Scorex Global Consultancy Team for 7 years. During this period led both direct client consultancy for risk management and Basel II in addition to best practice documentation. The global support was across over 25 countries, such as Taiwan, US, UK, South Korea, Brazil and Hungary.

At Creditinfo, he was initially managing director of Creditifno Decision then has moved to the Director of Business Development of Creditinfo International.
