

Creditinfo Dashboard

Creditinfo Dashboard is an analytical tool that provides quick access to reports based on extracted and summarized Credit Bureau data.

Components:

1. OPERATIONAL MIS

How is your credit bureau doing? What is the quality of data you collect? How many data providers do you have? How many of them pull reports? Keep an eye on your day-to-day operations!

2. "SALES" FRIEND or MARKET OVERVIEW

How much do you know about your Subscribers' business? How can they perform better, faster, cheaper, or uniquely, when using your services? Use your data to maximize your sales!

3. BENCHMARKING

Which lender has the highest market share? Who has the strongest risk management processes? Show your subscribers how do they perform relative to the industry. Promote yourself from a role of mere data provider to the role of strategic long-term partner!
